

Please note that this map has been designed to look best printed on A3 paper. If you are unable to print onto A3 paper we suggest the following options:

1. Go to the 'page scaling' setting in the 'Paper Handling' window of your printer properties and select 'tile all pages'. This will print out the entire document across the required amount of A4 sheets. Please note, not all printers will have this function.
2. If your printer does not have the 'tile all pages' feature and you would like to:

**Print the entire map on A4 pages**

Select the size at which you would like to view the map (the % number on the toolbar above the map). At 100% you will be able to view roughly one quarter of the map. Then, in the print settings for your printer select 'Current view' in the Print Range window and, Fit to Printer Margins in the Paper Handling (Page scaling) window. This will enable you to print the section of the map you are able to see on your screen.

To print the entire map, repeat the steps above for the corresponding sections of the map.

**Print a specific section of the map**

Select the size at which you would like to view the map (the % number on the toolbar above the map). On your screen, view the area of the map you would like copied. Then, in the print settings for your printer select 'Current view' in the Print Range window and Fit to Printer Margin in the Paper Handling window. This will enable you to print the section of the map you are able to see on your screen
